

Tristan Hafer

Frontend Developer

Orange County, CA • tristan@ultpcs.com • tristanhafer.com

SUMMARY

Frontend developer focused on building responsive, data-heavy dashboards with React and TypeScript. Six years building and evolving a production customer/internal portal — from complex data grids and form validation to squeezing extra performance out of the UI with WebAssembly.

SKILLS

Core: React 19, TypeScript, Vite, JavaScript **UI/Data:** Material-UI, Material React Table, React Query, Zod, react-hook-form **Performance:** WebAssembly integration (Rust/WASM), html2canvas, jsPDF **Tooling:** Docker-based CI/CD (self-hosted GitLab), Git

EXPERIENCE

Applied Cardiac Systems, Inc. — Irvine, CA *Project Manager, Software Developer* — September 2019 – Present

React Cloud Portal — customer/internal study & monitor management dashboard | 2020 – Present

- Built and maintain a React 19 + Vite frontend with Material-UI for managing cardiac monitoring studies and devices, backed by a PHP API
- Integrated a Rust-compiled WebAssembly module into the ECG waveform viewer to significantly speed up rendering of physiological data
- Built data grid interfaces with Material React Table, including custom checkbox edit components, and navigated a TypeScript compiler upgrade (tsgo/Project Corsia) that surfaced new type errors across the table integration
- Managed server state with React Query and built validation schemas with Zod and react-hook-form
- Implemented client-side PDF generation for ECG reports using html2canvas and jsPDF, plus ECG report upload functionality
- Delivered responsive layouts and streamlined workflows to improve usability for both internal staff and external customers

Public Business Site (acsd4u.com) | 2022 – Present

- Maintain a customer-facing WordPress site — theming, content updates, and performance tuning (caching, image compression) to keep the public-facing brand experience polished
